

ANALYSE THEMES

In efforts to maximise reflection and identify areas for development and improvement generated from a Cancer SEA we suggest you use a thematic analysis checklist included in the Feedback Instrument Tool included in the **Early Diagnosis of Cancer Significant Event Analysis Toolkit**. It may help to explore whether reflection has been extensive enough and also to prompt themes that could have been discussed or actioned more proactively.

The list of themes include:

- Avoidable or unavoidable delays
- Clinical Presentation
- Communication
- Co-morbid long term conditions
- Complexity of the case
- Consultation activity
- Continuity
- Documentation quality
- Education and guidelines
- History of a previous cancer
- In-practice systems
- Investigations and access to diagnostics
- Other
- Patient education and awareness
- Patient safety
- Practice staff issues
- Practitioner issues
- Primary-secondary care interface
- Read coding
- Referrals management
- Routes to diagnosis
- Safety netting
- Screening
- Teamwork
- Training
