Summary

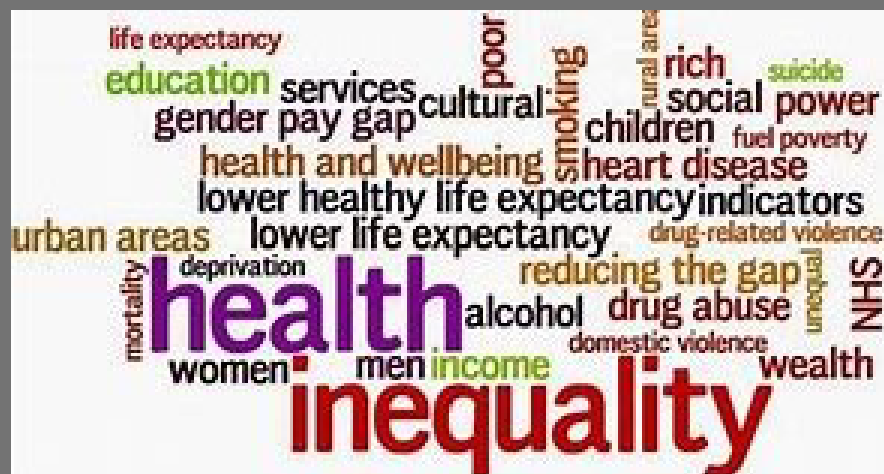

01

Introduction

Project Brief

The Greater Manchester (GM) Primary Care Provider Board (PCB) have responsibility for the GM Primary Care Networks (PCN) Development Programme. One of the key work streams is the sourcing, collection, presentation and reporting of meaningful data for PCNs.

In March 2021 the Utilisation Management Unit (UM) produced a 'Health Inequalities Data Report' for each of the Tameside and Glossop (T&G) PCNs. The reports provided an overview of multiple health inequality indicators and associated benchmarking, drawn from a range of existing data sources.

The PCB has commissioned UM to replicate (where possible) the work done for T&G and to produce reports for the remaining 62 PCNs across GM.

02

Key Findings

Key Findings

Data had to be sought and collated from several different sources; not all were available on a GP practice or PCN footprint and/ or were current.

Significant analytical input has been required to present available data in a meaningful way.

Health outcome data by PCN, such as, cancer survival rates, mental health outcomes and mortality from cardiovascular and respiratory disease have not been locatable.

Whilst rich information likely exists at individual GP Practice level, PCN aggregated and linked datasets are not accessible for secondary use.

Interrogation and segmentation of PCN populations, for example, by patient demographics is not possible from data currently available for secondary use.

Actionable intelligence regarding PCN level health inequalities is limited in the absence of access to linked practice and patient level aggregated data.

03

PCN Overview

Didsbury Chorlton Park & Burnage PCN

Collaborative of 4 GP Practices, located in the Didsbury, Burnage & Chorlton Park community neighbourhood;

GP Practice Code	GP Practice	Electoral Ward	Community Neighbourhood
P84034	Barlow Medical Centre	Didsbury East	Didsbury, Burnage & Chorlton Park
P84066	David Medical Centre	Chorlton Park	Didsbury, Burnage & Chorlton Park
P84678	Didsbury Medical Centre – Dr Whitaker	Didsbury East	Didsbury, Burnage & Chorlton Park
P84022	Kingsway Medical Practice	Didsbury East	Didsbury, Burnage & Chorlton Park

In order to establish the nature and level of health and socio-economic inequalities across Didsbury Chorlton Park & Burnage PCN, data have been sought at GP Practice and PCN levels where available.

Where this has not been possible this will be highlighted within the report.

For example, some data items were only available by Manchester resident population (community neighbourhood) rather than by registered PCN population (health neighbourhood).

Benchmarking at Manchester CCG, GM and national levels have been presented where data are available.

Note: PCN membership taken from ePCN file published by NHS Digital

Data Source: GMHSCP

04

Population Demographics

Didsbury Chorlton Park & Burnage PCN Population

Current Registered Population = 45,030

Male: 50%; Female: 50%

Start well (0-18yrs): 19%

Live well (19-67yrs): 70%

Age well (67+yrs): 10%

Predicted CCG Population Growth Over the Next 10 Years

Manchester CCG	Population Estimate 2021	Population Estimate 2031	% Change
Age Group			
0-19	143413	145065	↑1.15% (n=1652)
20-39	224780	225705	↑0.41% (n=926)
40-59	114739	118368	↑3.16% (n=3629)
60-79	59833	72199	↑20.67% (n=12366)
80+	13285	15138	↑13.95% (n=1853)
Total *	556050	576475	↑3.67% (n=20425)

Data Source: ONS

* Figures may not sum due to rounding

Data Source: GM PCN Dashboard

Predicted population growth across the CCG is in all age groups with the highest growth expected in the 60-79 and 80 plus year groups. The impact of the current Coronavirus pandemic on this predictive analysis is not known.

Vulnerable and At-Risk Groups

Ethnic Minorities

Current data have been sought but not found.

In 2011, for the wards corresponding to Didsbury Chorlton Park & Burnage PCN, 22.7% of the resident population was from an ethnic minority.

Data Source:
2011 Census Data on Nomis,
Office for National Statistics

LGBTQ+

Current data have been sought but not found.

It was estimated in 2017 that 4.6% of the population in Manchester identified themselves as LGBT.

Data Source:
Subnational Sexual
Identity, Office for
National Statistics

Unpaid Carers

Current data have been sought but not found.

In 2011, the number people providing unpaid care in wards corresponding to Didsbury Chorlton Park & Burnage PCN was 2644.

This number equates to 9.0% of the population.

Data Source:
2011 Census Data on Nomis,
Office for National Statistics

People whose 1st language is not English

Current data have been sought but not found.

1.83% (n=540) of households in the wards corresponding to Didsbury Chorlton Park & Burnage PCN have no residents with English as a first language.

Data Source:
2011 Census Data on Nomis,
Office for National Statistics

Military Veterans

Current data have been sought but not found.

In 2017 it was estimated that 4% of the population of Greater Manchester were military veterans.

Survey: UK Armed Forces
Veterans residing in Great
Britain

05

Life Expectancy

Manchester Life Expectancy (Resident Population)

Utilisation Management Unit

Male Life Expectancy

Manchester: 73.6 years

North West: 77.0 years

England: 78.7 years

Female Life Expectancy

Manchester : 78.6 years

North West: 81 years

England: 82.6 years

Male life expectancy from birth in Manchester is 5.1 years lower than the national average.

For women life expectancy is 4 years lower than the national average.

Male Healthy Life Expectancy

Manchester : 58.6 years

North West: 61.7 years

England: 62.2 years

Female Healthy Life Expectancy

Manchester : 58.6 years

North West: 62.2 years

England: 63.5 years

Healthy life expectancy is an estimate of lifetime spent in 'very good' or 'good' health based on how individuals perceive their health (ONS).

Figures for Manchester are below the national average by 3.6 years for men by 4.9 years for women.

Data Source: Office for National Statistics (ONS)

Life expectancy figures for 2017-2019
Healthy life expectancy figures for 2020

Life Expectancy: Early Years

Premature Births (less than 37 weeks gestation)

Rate per 1,000 births.

	Manchester	North West	England
2010-12	78.3	77.9	75.7
2011-13	79.1	79.6	76.7
2012-14	79.5	81.4	77.6
2013-15	77.7	82.7	78.4
2014-16	78.0	84.7	79.5
2015-17	79.6	86.0	80.6
2016-18	82.7	86.3	81.2

Child Mortality (1-17 years)

Directly standardised rate of death due to all causes per 100,000 resident population, aged 1-17 years.

	Manchester	North West	England
2010-12	21.1	14.2	12.5
2011-13	18.1	13.5	11.9
2012-14	16.6	13.1	12.0
2013-15	15.9	14.0	11.9
2014-16	16.1	14.3	11.6
2015-17	17.5	14.1	11.2
2016-18	18.4	13.3	11.0
2017-19	16.2	12.6	10.8

06

Disease Prevalence

Asthma

Utilisation Management Unit

Data Source: Quality Outcomes Framework, 2020/21

Didsbury Chorlton Park & Burnage PCN Asthma	Practice Prevalence
Barlow Medical Centre	5.71%
David Medical Centre	7.42%
Didsbury Medical Centre – Dr Whitaker	5.79%
Kingsway Medical Practice	7.77%
PCN Average	6.30%

GM Average	England Average
6.88%	6.38%

2019/20 data show that 74.50% were in receipt of an asthma review in the preceding 12 months. Robert Darbshire Practice PCN had the highest achievement across Manchester at 90.14%.

Funnel Plot : Asthma: QOF prevalence (6+ yrs)

Didsbury Chorlton Park & Burnage PCN's asthma prevalence was similar to the national rate.

Cancer

Data Source: Quality Outcomes Framework, 2020/21

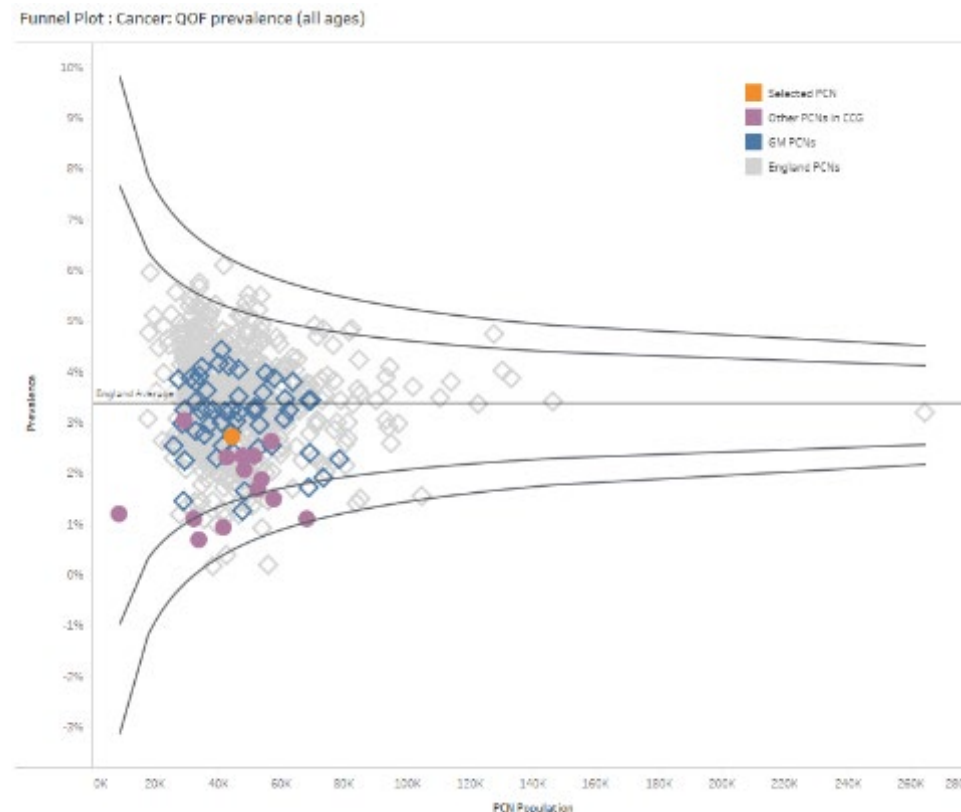

Didsbury Chorlton Park & Burnage PCN Cancer	Practice Prevalence
Barlow Medical Centre	2.82%
David Medical Centre	2.38%
Didsbury Medical Centre – Dr Whitaker	2.39%
Kingsway Medical Practice	3.72%
PCN Average	2.73%

GM Average	England Average
2.81%	3.21%

Didsbury Chorlton Park & Burnage PCN's cancer prevalence was lower than the national average.

2019/20 data show that 94.81% of those diagnosed with cancer in the preceding 15 months, were in receipt of a review within 6 months of the date of diagnosis. Hulme & City Centre South PCN had the highest achievement across Manchester at 97.78%.

- Published QOF data for 2020/21 does not contain achievement data

Information regarding PCN cancer outcomes has been sought but not found, however district level data for 2020 suggest survival rates are lower across Manchester.

Fingertips PHE (2020) Per 100,000 Population	England	Manchester
Under 75 Mortality from Cancer	125.1	187.1
Under 75 Mortality from Cancer Considered Preventable	51.5	98.2

Cardiovascular Disease - Primary Prevention (30-74 years)

Utilisation Management Unit

Data Source: Quality Outcomes Framework, 2019/20

Didsbury Chorlton Park & Burnage PCN CVD-PP	Practice Prevalence
Barlow Medical Centre	0.87
David Medical Centre	0.98%
Didsbury Medical Centre – Dr Whitaker	0.74%
Kingsway Medical Practice	1.09%
PCN Average	0.88%

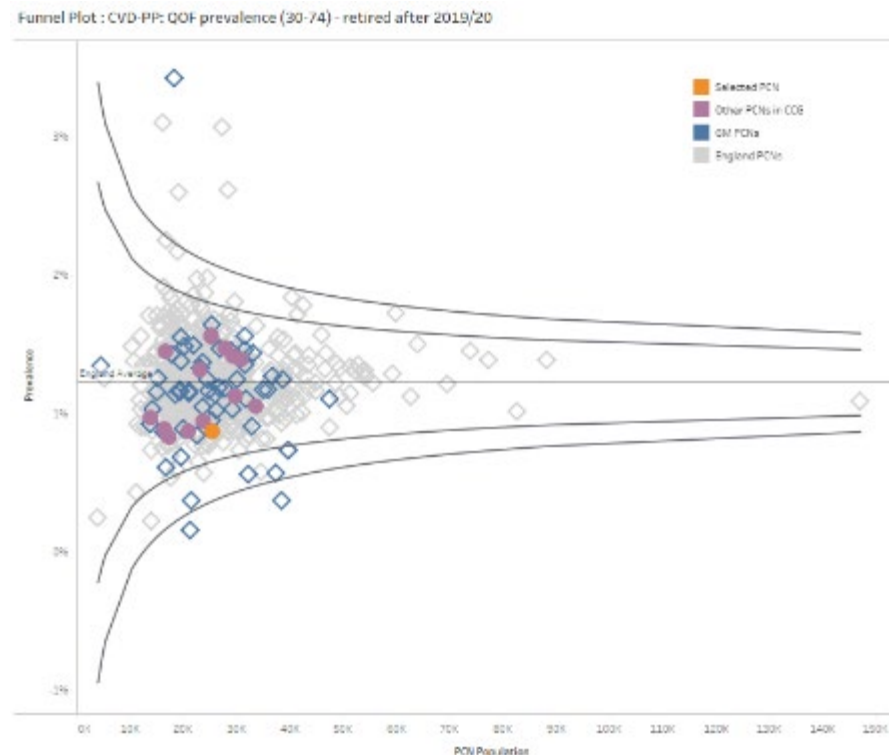

GM Average	England Average
1.16%	1.19%

Didsbury Chorlton Park & Burnage PCN's CVD-PP prevalence was lower than the national average.

2019/20 data show that 100% of this cohort who had a recorded CVD risk assessment score of $\geq 20\%$ in the preceding 12 months were treated with statins.

City Centre and Ancoats PCN, West Central Manchester PCN, Didsbury Chorlton Park and Burnage PCN and Robert Darbshire Practice PCN had the highest achievement across Manchester at 100%.

- Published QOF data for 2020/21 does not contain achievement data
- CVD prevalence was not included in the 2020/21 QOF

Information regarding PCN cardiovascular disease outcomes has been sought but not found, however district level data for 2020 suggest worse outcomes across Manchester.

Fingertips PHE (2020) Per 100,000 Population	England	Manchester
Under 75 Mortality from all Cardiovascular diseases	73.8	135.2
Under 75 Mortality from Cardiovascular Disease Considered Preventable	29.2	55.0

Chronic Obstructive Pulmonary Disease (COPD)

Data Source: Quality Outcomes Framework, 2020/21

Didsbury Chorlton Park & Burnage PCN COPD	Practice Prevalence
Barlow Medical Centre	1.11%
David Medical Centre	2.73%
Didsbury Medical Centre – Dr Whitaker	1.02%
Kingsway Medical Practice	2.37%
PCN Average	1.51%

GM Average	England Average
2.34%	1.93%

Didsbury Chorlton Park & Beswick PCN's COPD prevalence is lower than the national average.

2019/20 data show that 85.00% were in receipt of a COPD review in the preceding 12 months. Hulme Moss Side and Rusholme PCN had the highest achievement across Manchester at 97.71%.

- Published QOF data for 2020/21 does not contain achievement data

Funnel Plot : COPD: QOF prevalence (all ages)

Information regarding PCN respiratory disease outcomes has been sought but not found, however district level data for 2020 suggest worse outcomes across Manchester.

Fingertips PHE (2020) Per 100,000 Population	England	Manchester
Under 75 Mortality from Respiratory Disease	29.4	77.2
Under 75 Mortality from Respiratory Disease Considered Preventable	17.1	53.7

Dementia

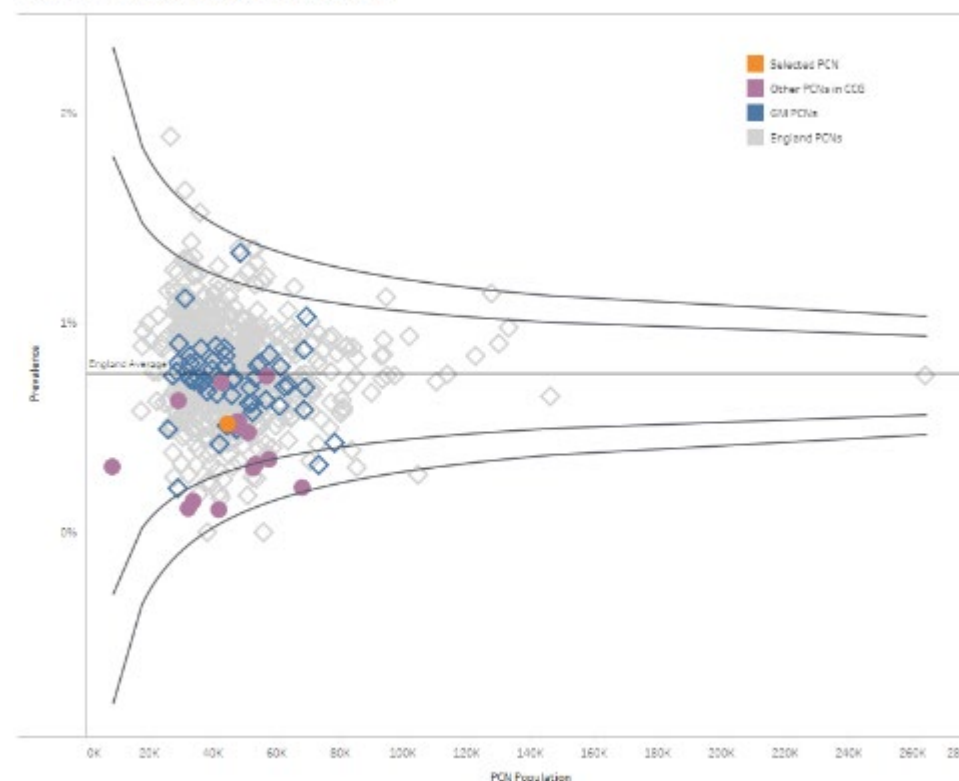

Data Source: Quality Outcomes Framework, 2020/21

Didsbury Chorlton Park & Burnage PCN Dementia	Practice Prevalence
Barlow Medical Centre	0.77%
David Medical Centre	0.44%
Didsbury Medical Centre – Dr Whitaker	0.27%
Kingsway Medical Practice	0.52%
PCN Average	0.52%

GM Average	England Average
0.65%	0.71%

2019/20 data show that 79.91% had their care plan reviewed in a face-to-face meeting in the preceding 12 months. Wythenshawe PCN had the highest achievement across Manchester at 95.16%.

Funnel Plot : Dementia: QOF prevalence (all ages)

Didsbury Chorlton Park & Burnage PCN's dementia prevalence is lower than the national rate.

- Published QOF data for 2020/21 does not contain achievement data

Diabetes (17 years+)

Data Source: Quality Outcomes Framework, 2020/21

Didsbury Chorlton Park & Burnage PCN Diabetes	Practice Prevalence
Barlow Medical Centre	4.27%
David Medical Centre	8.37%
Didsbury Medical Centre – Dr Whitaker	3.24%
Kingsway Medical Practice	7.99%
PCN Average	5.07%

GM Average	England Average
7.39%	7.11%

2019/20 data show in the absence of moderate or severe frailty, that for 66.94% their last IFCC-HbA1c was 58 mmol/mol or less in the preceding 12 months. Robert Darbishire Practice PCN had the highest achievement across Manchester at 76.19%.

85.18% were recorded as being in receipt of a foot examination and risk classification within the preceding 12 months. Hulme Moss Side and Rusholme had the highest achievement across Manchester at 96.93%.

- Published QOF data for 2020/21 does not contain achievement data

Funnel Plot : Diabetes: QOF prevalence (17+)

Didsbury Chorlton Park & Burnage PCN's diabetes prevalence is lower than the national average.

Hypertension

Data Source: Quality Outcomes Framework, 2020/21

Didsbury Chorlton Park & Burnage PCN Hypertension	Practice Prevalence
Barlow Medical Centre	8.84%
David Medical Centre	13.34%
Didsbury Medical Centre – Dr Whitaker	7.18%
Kingsway Medical Practice	11.67%
PCN Average	9.41%

GM Average	England Average
13.33%	13.93%

2019/20 data show for those aged 79 years or under, that for 64.66% their last blood pressure recording was 140/90 mmHg or less in the preceding 12 months.

Cheetham Hill & Crumpsall PCN had the highest achievement across Manchester at 77.73%.

Funnel Plot : Hypertension: QOF prevalence (all ages)

Didsbury Chorlton Park & Burnage PCN's hypertension prevalence was lower than the national rate.

- Published QOF data for 2020/21 does not contain achievement data

Learning Disability

Data Source: Quality Outcomes Framework, 2020/21

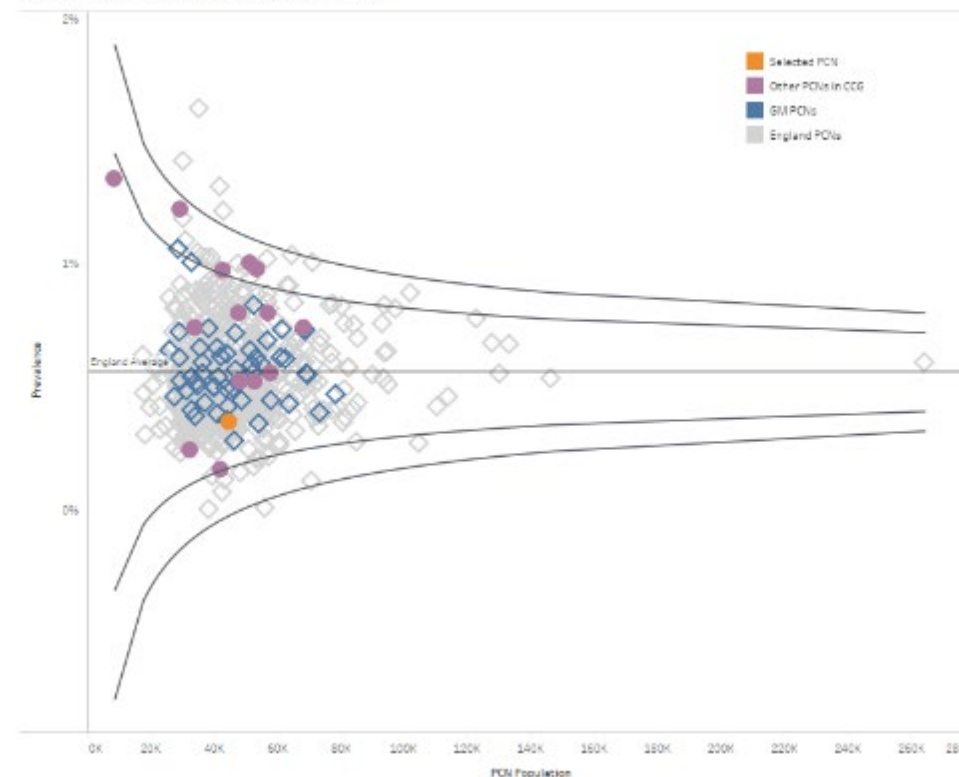

Didsbury Chorlton Park & Burnage PCN Learning Disability	Practice Prevalence
Barlow Medical Centre	0.31%
David Medical Centre	0.72%
Didsbury Medical Centre – Dr Whitaker	0.22%
Kingsway Medical Practice	0.41%
PCN Average	0.36%

GM Average	England Average
0.60%	0.53%

Annual health check data which has been located by CCG show that the percentage of health checks completed are above GM and national levels.

Learning Disabilities Health Check Scheme, NHS Digital	2018/19	2019/20
Manchester CCG	57.3%	58.8%
GM	52.5%	55.9%
England	51.3%	51.9%

Funnel Plot : Learning disability: QOF prevalence

Didsbury Chorlton Park & Burnage PCN's learning disability prevalence was lower than the national rate.

- Published QOF data for 2020/21 does not contain achievement data

Severe Mental Health

Utilisation Management Unit

Data Source: Quality Outcomes Framework, 2020/21

Didsbury Chorlton Park & Burnage PCN Severe Mental Health	Practice Prevalence
Barlow Medical Centre	1.00%
David Medical Centre	1.25%
Didsbury Medical Centre – Dr Whitaker	0.84%
Kingsway Medical Practice	1.08%
PCN Average	1.00%

GM Average	England Average
1.05%	0.95%

2019/20 data show that 79.75% of those on the severe mental health register had a comprehensive care plan documented in their care record in the preceding 12 months. Hulme Moss Side and Rusholme PCN had the highest achievement across Manchester at 96.92%.

Information regarding PCN Mental Health outcomes has been sought but not found, however district level data suggest a lower level of suicide and intentional self-harm across Manchester, when benchmarked against national figures.

- Published QOF data for 2020/21 does not contain achievement data

Funnel Plot : Mental Health: QOF prevalence (all ages)

Didsbury Chorlton Park & Burnage PCN's severe mental health prevalence is similar to the national average.

Fingertips PHE Per 100,000 Population	England	Manchester
Suicide Rate (2018/20)	10.4	9.3
Emergency Hospital Admissions for Intentional Self-Harm (2020/21)	181.2	162.2

Visual Impairment

Data regarding the number of Didsbury Chorlton Park & Burnage PCN adults who have a moderate or severe visual impairment has been sought but not found. Estimated numbers with projections to 2040 that are available on a Manchester footprint, suggest increasing prevalence attributed to ageing populations. Whilst some sight loss may be correctable, age related macular degeneration is the most common cause of registrable sight loss in older people.

Manchester	2020	2025	2030	2035	2040
People aged 18-64 predicted to have a serious visual impairment	246	248	253	257	259
People aged 65-74 predicted to have a moderate or severe visual impairment	1,646	1,770	2,022	2,206	2,178
People aged 75 and over predicted to have a moderate or severe visual impairment	2,778	2,988	3,212	3,559	4,080
Total	4,670	5,006	5,487	6,022	6,517

Hearing Loss

Utilisation Management Unit

Data regarding how many Didsbury Chorlton Park & Burnage PCN adults have hearing loss has been sought but not found.

Estimated numbers with projections to 2040 available on a Manchester footprint suggest increasing prevalence attributed to an ageing population.

Hearing loss is a common but often unacknowledged long term condition that can have an adverse impact on a person's health and quality of life.

Manchester Some Hearing Loss	2020	2025	2030	2035	2040
People aged 18-64 predicted to have some hearing loss	25,950	27,064	27,341	27,422	27,766
People aged 65-74 predicted to have some hearing loss	13,307	14,083	16,095	17,753	17,761
People aged 75 -84 predicted to have some hearing loss	11,432	12,395	13,678	14,733	17,156
People aged 85+ predicted to have some hearing loss	5,948	6,043	6,231	7,267	7,992
Total	56,637	59,585	63,345	49,175	70,675
Figures may not sum due to rounding					

Manchester Severe Hearing Loss	2020	2025	2030	2035	2040
People aged 18-64 predicted to have severe hearing loss	1,634	1,718	1,719	1,677	1,707
People aged 65-74 predicted to have severe hearing loss	856	905	1,034	1,141	1,144
People aged 75 -84 predicted to have severe hearing loss	1,618	1,670	1,931	2,008	2,332
People aged 85+ predicted to have severe hearing loss	1,420	1,443	1,488	1,735	1,908
Total	5,528	5,736	6,172	6,561	7,091
Figures may not sum due to rounding					

07

Disease Prevention

7.1 Life Style

Physical Activity

Information regarding physical activity was only locatable at a district level.

Fingertips PHE	England	Manchester
Percentage of Physically Active Children and Young People (2020/21)	44.6%	*
Percentage of Physically Active Adults (2019/20)	66.4%	62.4%

* Value missing due to small sample size

For the period 2019/20, data suggest when benchmarked against national figures, a lower proportion of physically active adults in Manchester.

Obesity (18 years+)

Data Source: Quality Outcomes Framework, 2020/21

Didsbury Chorlton Park & Burnage PCN Obesity	Practice Prevalence
Barlow Medical Centre	2.30%
David Medical Centre	4.65%
Didsbury Medical Centre – Dr Whitaker	4.46%
Kingsway Medical Practice	4.26%
PCN Average	3.66%

GM Average	England Average
6.98%	6.88%

Data regarding *childhood obesity* has only been locatable at a district level.

Fingertips PHE	England	Manchester
Year 6: Prevalence of Overweight including Obesity (2019/20)	35.2%	42.0%

- Published QOF data for 2020/21 does not contain achievement data
- In order to appear on the obesity register there has to have been a recording of height and weight in the last 12 months. Fewer health checks during the pandemic has likely led to lower levels of obesity being recorded.

Didsbury Chorlton Park & Burnage PCN's obesity prevalence is lower than the national average.

Smoking (15 years+)

Data Source: Quality Outcomes Framework, 2020/21

Didsbury Chorlton Park & Burnage PCN Smoking	Practice Prevalence
Barlow Medical Centre	10.13%
David Medical Centre	22.00%
Didsbury Medical Centre – Dr Whitaker	9.82%
Kingsway Medical Practice	17.14%
PCN Average	12.86%

GM Average	England Average
17.50%	15.94%

2019/20 data show that 81.46% of smokers had a record of an offer of support and treatment within the preceding 24 months. Cheetham Hill & Crumpsall PCN had the highest achievement across Manchester at 98.13%.

Data regarding **smoking in pregnancy** has only been locatable at a district level;

Fingertips PHE	England	Manchester
Smoking Status at Time of Delivery (2020/21)	9.6%	8.9%

- Published QOF data for 2020/21 does not contain achievement data

Funnel Plot : Estimated smoking prevalence (QOF)

Didsbury Chorlton Park & Burnage PCN's smoking prevalence is lower than the national rate.

Data regarding the prevalence of e-cigarette use have been sought but not found.

Tooth Decay in 3 Year Olds

Mean severity of tooth decay in children aged three years based on the mean number of teeth per child sampled which were either actively decayed or had been filled or extracted.

	2012/13	2019/20
Manchester	1.06	0.76
NW	0.47	0.42
England	0.36	0.31

Chlamydia Detection Rates

All chlamydia diagnoses in 15 to 24 year olds attending specialist and non-specialist sexual health services, who are residents in England, expressed as a rate per 100,000 population.

	2015	2016	2017	2018	2019	2020
Manchester	2102	2014	1827	2082	2276	1201
NW	2361	2277	2168	2176	1990	1249
England	1914	1917	1929	1999	2043	1420

Accidental Poisoning in 0-4 Year Olds

Emergency hospital admissions per 100,000 resident population due to accidental poisoning in children aged 0-4 years.

	2014/15-16/17	2015/16-17/18	2016/17-18/19	2017/18-19/20
Manchester	240.6	197.3	190.4	180.9
NW	217.5	204.8	196.6	180.3
England	145.5	136.1	126.6	118.2

Teenage Mothers

Percentage of delivery episodes, where the mother is aged under 18 years.

	2016/17	2017/18	2018/19	2019/20
Manchester	0.7%	0.8%	0.5%	0.7%
NW	0.9%	0.9%	0.8%	0.8%
England	0.8%	0.7%	0.6%	0.7%

7.2 Immunisation

Flu Vaccination: 65 & Over

Data Source: GM HSCP

2019/20 Flu Season: Didsbury Chorlton Park & Burnage PCN 65 & over vaccination uptake was 69.56%.

1 of 4 practices met the 75% vaccination target in 2019/20.

2020/21 Flu Season: Vaccine uptake increased with an overall rate for the PCN of 78.34%.

3 of 4 practices met the 75% vaccination target in 2020/21.

Flu Vaccination: Under 65 (at risk only)

Data Source: GM HSCP

2019/20 Flu Season: Didsbury Chorlton Park & Burnage PCN's under 65 at risk only vaccination uptake was 44.19%.

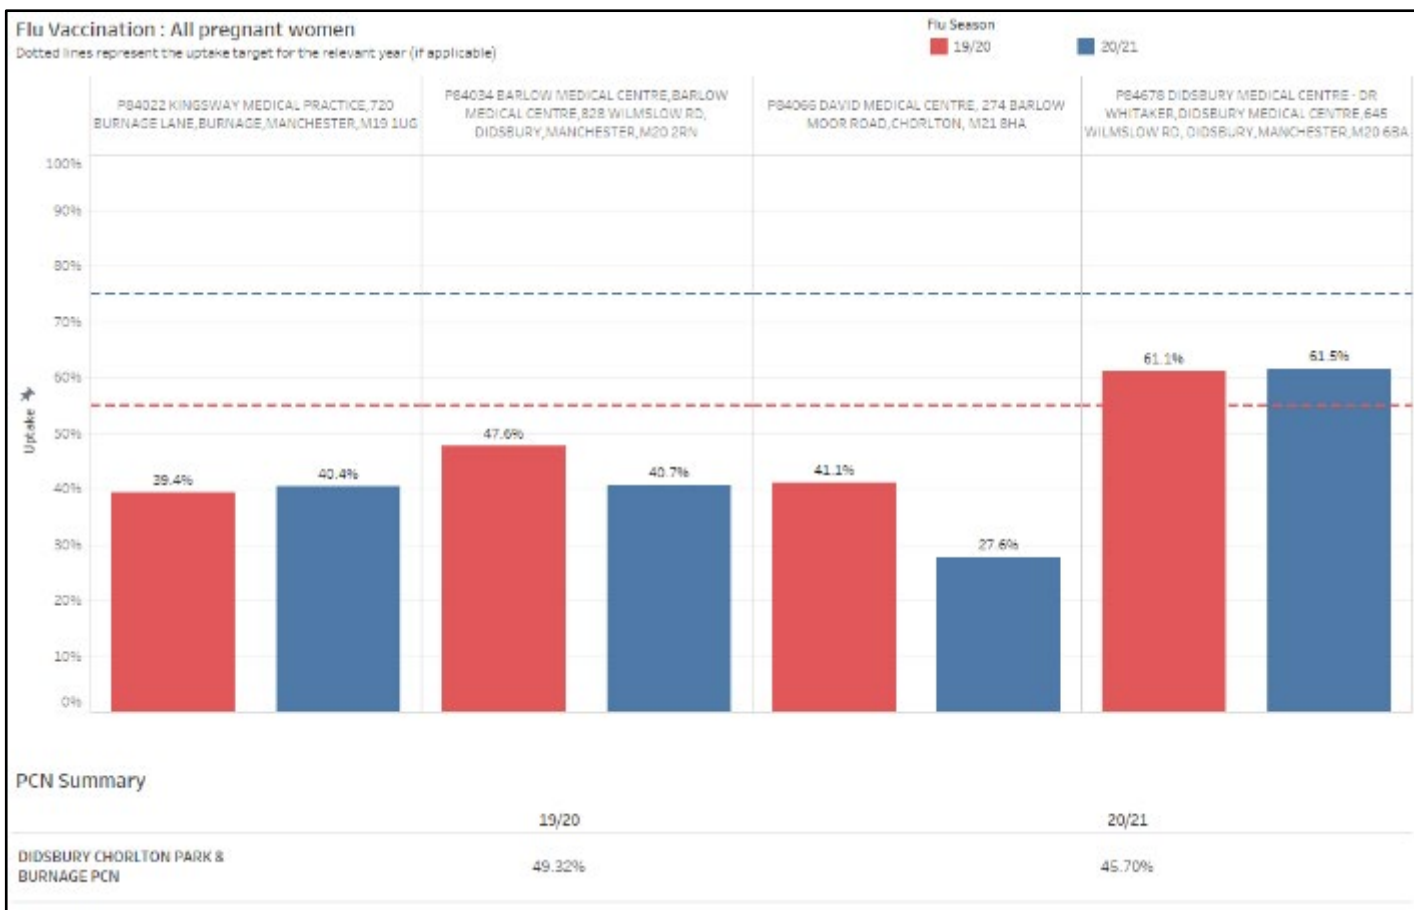

No practices reached the 55% uptake target in 2019/20.

2020/21 Flu Season: Didsbury Chorlton Park & Burnage PCN's under 65 at risk only vaccination uptake was higher than that of the previous year at 52.60%.

However, no practices reached the revised target of 75% in 2020/21.

Flu Vaccination: All Pregnant Women

Data Source: GM HSCP

2019/20 Flu Season: Didsbury Chorlton Park & Burnage PCN's all pregnant women vaccination uptake was 49.32%.

1 of 4 practices reached the 55% uptake target in 2019/20.

2020/21 Flu Season: Uptake across the PCN was 45.70%, slightly lower than that of the previous year.

No practices reached the revised 75% uptake target in 2020/21.

Flu Vaccination: Carers

Data Source: GM HSCP

2019/20 Flu Season: Didsbury Chorlton Park & Burnage PCN's carers vaccination uptake was 37.46%.

2020/21 Flu Season: Uptake was 50.35%, higher than that of the previous year.

Flu Vaccination: All Aged 2

Data Source: GM HSCP

2019/20 Flu Season: Didsbury Chorlton Park & Burnage PCN's all aged 2 vaccination uptake was 44.25%.

No practices reached the target of 50% in 2019/20.

2020/21 Flu Season: Uptake across the PCN was higher than that of the previous year with a rate of 60.20%.

However, no practices reached the revised 75% uptake target in 2020/21.

Flu Vaccination: All Aged 3

Data Source: GM HSCP

2019/20 Flu Season: Didsbury Chorlton Park & Burnage PCN's all aged 3 vaccination uptake was 46.00%.

1 of 4 practices reached the target of 50% in 2019/20.

2020/21 Flu Season: Uptake increased across the PCN at 64.50%.

However, no practices reached the revised 75% uptake target in 2020/21

Child Immunisations Up to Five Years of Age (GP)

Utilisation Management Unit

Data Source: Child Health Information Systems, Public Health England, 2020/21

Expectation in the UK is that there is 95% coverage of all routine childhood immunisations for those up to five years of age (BMA, 2020).

6-in-1 Vaccine

3 doses at 8,12 & 16 weeks

Data Measure

% of children who received 3 doses of the 6-in-1 vaccine by their 1st birthday.

6-in-1 Vaccine	% Vaccinated

2018/19	66.5%	69.7%	72.6%

Air Pollution

Fine particulate matter (PM2.5) is comprised of particles with a diameter smaller than 2.5µm. Sources can be industrial, commercial and agricultural in nature; however, road transport remains the biggest contributor to urban pollution.

PM2.5 can penetrate deep into the lungs and enter the blood stream. Exposure is associated with poor health outcomes from diseases, such as, asthma, COPD, lung cancer and coronary heart disease and impacts on low birth weight, diabetes and neurodegenerative diseases.

Whilst there are no established safe inhalation levels, the World Health Organisation (WHO) advocates a PM2.5 annual limit of 10µg/m³ as a starting point to encourage progressive reductions.

Whilst predicted annual average data from the British Lung Foundation (2018) suggest that Didsbury Chorlton Park & Burnage PCN practices are not located in areas which exceed WHO safe air pollution limits, it is acknowledged that actual PM2.5 levels may be greater in some areas when taking into consideration short-term exposure to high levels of fine particulate matter by the side of busy roads.

Didsbury Chorlton Park & Burnage PCN	PM2.5 (µg/m ³)
Barlow Medical Centre	7.81

10.3 End of Life

Deaths in Usual Place of Residence

Data Source: ONS

11

Summary

Summary

Utilising the data that are currently available it is not possible to comprehensively establish the nature, level and drivers of health inequalities across the 15 Manchester PCNs.

Health outcome data do not appear to be available on a PCN footprint.

Whilst rich information is likely available at individual GP practice level, PCN aggregated and linked datasets are not accessible (for secondary use) to provide actionable insight into which communities and individuals to target, engage and work with where;

- Comparatively high disease prevalence exists.
- There are opportunities for life style interventions.
- There is overutilisation of unplanned services, such as, NHS 111 and ED, and underutilisation of preventative services, such as, annual health reviews and checks, immunisation and cancer screening.

Or to scrutinise practice level activity in order to identify, understand and reduce any unwarranted variation.
