Summary

01

Introduction

Project Brief

The Greater Manchester (GM) Primary Care Provider Board (PCB) have responsibility for the GM Primary Care Networks (PCN) Development Programme. One of the key work streams is the sourcing, collection, presentation and reporting of meaningful data for PCNs.

In March 2021 the Utilisation Management Unit (UM) produced a 'Health Inequalities Data Report' for each of the Tameside and Glossop (T&G) PCNs. The reports provided an overview of multiple health inequality indicators and associated benchmarking, drawn from a range of existing data sources.

The PCB has commissioned UM to replicate (where possible) the work done for T&G and to produce reports for the remaining 62 PCNs across GM.

02

Key Findings

Key Findings

Data had to be sought and collated from several different sources; not all were available on a GP practice or PCN footprint and/ or were current.

Significant analytical input has been required to present available data in a meaningful way.

Health outcome data by PCN, such as, cancer survival rates, mental health outcomes and mortality from cardiovascular and respiratory disease have not been locatable.

Whilst rich information likely exists at individual GP Practice level, PCN aggregated and linked datasets are not accessible for secondary use.

Interrogation and segmentation of PCN populations, for example, by patient demographics is not possible from data currently available for secondary use.

Actionable intelligence regarding PCN level health inequalities is limited in the absence of access to linked practice and patient level aggregated data.

03

PCN Overview

Hindley PCN

Collaborative of 7 GP Practices, located in the Ince, Hindley, Abram, Platt Bridge community neighbourhood;

GP Practice Code	GP Practice	Electoral Ward	Community Neighbourhood
P92006	Dr Ahmad & Ptnrs	Abram	Ince, Hindley, Abram, Platt Bridge
P92004	Dr Tun & Partners	Hindley	Ince, Hindley, Abram, Platt Bridge
P92616	Higher Ince Surgery	Ince	Ince, Hindley, Abram, Platt Bridge
P92620	Lower Ince Surgery	Ince	Ince, Hindley, Abram, Platt Bridge
P92016	Pennygate Medical Centre	Hindley	Ince, Hindley, Abram, Platt Bridge
Y02274	Rivington Way Surgery	Ince	Ince, Hindley, Abram, Platt Bridge
P92031	Ullah M	Abram	Ince, Hindley, Abram, Platt Bridge

In order to establish the nature and level of health and socio-economic inequalities across Hindley PCN, data have been sought at GP Practice and PCN levels where available.

Where this has not been possible this will be highlighted within the report.

For example, some data items were only available by Wigan resident population (community neighbourhood) rather than by registered PCN population (health neighbourhood).

Benchmarking at Wigan Borough CCG, GM and national levels have been presented where data are available.

Note: PCN membership taken from ePCN file published by NHS Digital

Visual Impairment

Data regarding the number of Hindley PCN adults who have a moderate or severe visual impairment has been sought but not found. Estimated numbers with projections to 2040 that are available on an Wigan footprint, suggest increasing prevalence attributed to ageing populations. Whilst some sight loss may be correctable, age related macular degeneration is the most common cause of registrable sight loss in older people.

Wigan	2020	2025	2030	2035	2040
People aged 18-64 predicted to have a serious visual impairment	128	129	129	128	128

Hearing Loss

Utilisation Management Unit

Data regarding how many Hindley PCN adults have hearing loss has been sought but not found.

Estimated numbers with projections to 2040 available on an Wigan footprint suggest increasing prevalence attributed to an ageing population.

Hearing loss is a common but often unacknowledged long term condition that can have an adverse impact on a person’s health and quality of life.

Wigan Some Hearing Loss	2020	2025	2030	2035	2040

7.1 Life Style

Physical Activity

Information regarding physical activity was only locatable at a district level. No district figures on the percentage of physically active children and young people were available across Greater Manchester for 2019/20. For 2018/19 the percentage of physically active children and young people was slightly higher in Wigan than in England as a whole.

Fingertips PHE	England	Wigan
Percentage of Physically Active Children and Young People (2018/19)	46.8%	48.4%
Percentage of Physically Active Adults (2019/20)	66.4%	60.7%

For the period 2019/20, data suggest when benchmarked against national figures, a higher proportion of physically inactive adults in Wigan.

Air Pollution

Fine particulate matter (PM2.5) is comprised of particles with a diameter smaller than 2.5µm. Sources can be industrial, commercial and agricultural in nature; however, road transport remains the biggest contributor to urban pollution.

PM2.5 can penetrate deep into the lungs and enter the blood stream. Exposure is associated with poor health outcomes from diseases, such as, asthma, COPD, lung cancer and coronary heart disease and impacts on low birth weight, diabetes and neurodegenerative diseases.

Whilst there are no established safe inhalation levels, the World Health Organisation (WHO) advocates a PM2.5 annual limit of 10µg/m³ as a starting point to encourage progressive reductions.

Whilst predicted annual average data from the British Lung Foundation (2018) suggest that Hindley PCN practices are not located in areas which exceed WHO safe air pollution limits, it is acknowledged that actual PM2.5 levels may be greater in some areas when taking into consideration short-term exposure to high levels of fine particulate matter by the side of busy roads.

Summary

Summary

Utilising the data that are currently available it is not possible to comprehensively establish the nature, level and drivers of health inequalities across the seven Wigan PCNs.

Health outcome data do not appear to be available on a PCN footprint.

Whilst rich information is likely available at individual GP practice level, PCN aggregated and linked datasets are not accessible (for secondary use) to provide actionable insight into which communities and individuals to target, engage and work with where;

- Comparatively high disease prevalence exists.
- There are opportunities for life style interventions.
- There is overutilisation of unplanned services, such as, NHS 111 and ED, and underutilisation of preventative services, such as, annual health reviews and checks, immunisation and cancer screening.

Or to scrutinise practice level activity in order to identify, understand and reduce any unwarranted variation.
